Table of Contents

Research on the Information Construction of Smart Grid Based on the Internet of Things

Ma Xingang, Zang Yuwei, Xie Lianke, Zhang Yong, Xu Naiyuan 1

Analysis and Research on Big Data Query Technology Based on NOSQL Database

Shuiquan Guo 6

Electromagnetic Interference of Switching Power Supplies and Corresponding Restraining Measures

Shusen Meng 11

Quality and Reliability of Network Community Information from User's Perspective

Xie Hui 15

Analysis of the Application of Linear Algebraic Method in Solving Higher Mathematics Problems

Yin Deyu 20

A Brief Analysis of the Effective Application of Power Electronic Devices in Power System

Gao Xueqian 25

Design and Research of Electronic Circuit Fault Diagnosis Based on Artificial Intelligence

Wang Yongdong 30

Research on Management Model of Automobile Manufacturing Line Based on RFID Technology

Wan Teng, Xiaoping Wang 35

Research on Ultrasonic Testing Technology of Bearing Bush of Turbo Generator

Jian Yin, Yuheng Ning 40

Discussion on IPRAN Transmission Network Development for 5G Evolution

Libo Chen 47

Application Research of Extraction Algorithm of Image Feature Information in Intelligent Video Monitor

Haoyin Lv 53

Analysis of Computer Network Security Strategy in the Library

Changjin Guo 58

Research on Design and Development of Data Processing Platform Based on Hadoop

Yaning Yan 62

Research on Face Recognition Technology Based on Computer Neural Network

Yaning Yan 66

Detection of Gene Expression from Vitis by Real Time Quantitative RT-PCR

Quan Zhao 71

A Novel Probability Evaluation Method for Power System Transient Stability Assessment Based on Support Vector Machine

Li Xin, Fan Youping, Zhang Peng, Liu Songkai 78

Research on the Design of Digital Library Cloud Service Platform Based on the Integration of Scattered Digital Information Resources in the Age of Cloud Computing

Yun Fan 84

The Key Technology of Medical Image Cloud Service Based on "Internet + Medical Combination"

Xuan Zheng, Lijuan Zheng 89

The Application of Big Data Technology in Library Information Resource Construction

Xin Fu 94

Comprehensive Evaluation Model of Software Architecture Reliability Based on Pattern Recognition Algorithm

Lu Jun, Pan Huaqiang 98

Speed Control and Frequency Conversion Interference Treatment of Variable Frequency Ventilator

Sun Guoli 102

An Analysis of the Electromagnetic Environment of UHV-grade Transmission

Xie Lianke, Zhang Yong, Zang Yuwei, Ma Xingang, Zhang Guoying 109

Research on Information Security Risk Assessment Strategy on China's Campus Based on AHP Method

He Honglin 113

Research on Development of High Precision Frequency Stability Meter

Jin Zhouyi 119

Analysis of Large Data Mining Platform Based on Cloud Computing

Fei Qi, Furong Yang 126

Research on Key Technology of Distributed Storage in Cloud Computing Environment

Lin Zhu, Li Zhuang, Caihong Li 130

Outdoor Self-Localization Method Based on Clustering and RSSI

Tong Wencan, Zhang Ling, Chen Pen, Huang Hongkun 135

The Application of Computer Technology in Graphic and Image Processing

Zhao Xiaolei 142

Research on Security Control Strategy of Electronic Information Network Transmission

Ren Siying 147

Research on Computer Network Remote Control Technology

Gang Chen, Dawei Zhao 151

Research on Embedded Software Design and Algorithm

Qing Wan 155

Research on Image Color Control Based on ICC Profile

Jia Wang 159

Study on Computer Security Focus and Its Key Technologies

Dongyan Jiao 163

Application of System Engineering Method in Computer Software Design

Fang Wang 167

Research of Quantum Entanglement Control and Decoherence

Zhaohua Wang, Liqing Ren, Hanying Wang 171

Research of Quantum Entanglement and Quantum Coherence Caused by Atomic Ensembles in Optical Cavity

Zhaohua Wang, Liqing Ren, Hanying Wang 176

The Research of Impact of Quantum Entanglement and Decoherence on Determinative Remote Preparation

Zhaohua Wang, Liqing Ren, Hanying Wang 181

Research of Status and Prospect of Virtual Instrument Technology

Li Wang, Zhaohua Wang 185

Processing Method for Yield Monitoring Signal of Impulse Type Grain Flow Sensor

Li Wang, Zhaohua Wang 190

Real - Time Operation Strategy and Strategy Evaluation of Photovoltaic Charging Station Considering Transmission Loss and Charging Demand

Hongyi Chen, Mingyang Zhang, Guangzhao Yang, Weicong Lin, Xinyue Wang 195

Research on Modern Office Information System under Cloud Environment

Yu Mingyi 203

Research on Routing Algorithm of Wireless Sensor Networks Based on Energy Balance

He Qian 207

Research on Data Security Storage Strategy in Cloud Environment

He Qian 212

Research on Network Undergraduates Sports Service System Based on Multi-Agent Technology

Cong Ding 216

The Study of Routing Protocol for UAV Flock Network

Wenjing Yang, Haiyan Zhao 220

Research on Path Planning Optimization of Body Welding Robot

Qiu Zhimin, Ye Lan 224

Research on the Mental Fatigue Evaluation of Modern Manufacturing Operators Based on Bp Neural Network

Ye Lan, Zou Jinhong, Zhang Jie 229

Research of Image Recognition Algorithm Based on Depth Learning

Zhang Jian, Ji Xinhao 235

E-commerce Distribution Network Optimization Research Based on B2C

XiaoQing Bi, Chao Liu 240

Research on the Risk Assessment Standard and Method of Computer Network Information Security

Shi Jing, Dong Jingjing, Wang Gang, Song Jingjing 245

Research on Dance Motion Simulation Based on Virtual Reality Technology

Zhang Yi 250

Design and Implementation of Intelligent Campus Support Service Platform Based on Cloud Computing

Wang Fangzheng 255

Analysis and Processing of Massive Data Based on Hadoop Platform

Chenxiang Zhang 260

Design and Implementation of Intelligent Robot Arm Structure Information Algorithm

Wei Chen 265

Design and Research of Batch Query System Based on Java

Menglin Liu, Li Zhang, Zhenzhen Wang, Jianguang Liu 269

The Data Acquisition Experiment Device by Parallel SPP Model Design

Chang Liu 274

Studies on Management Accounting Informatization Strategy Based on Financial Shared Service

Hongli Peng 278

Research on the Management and Application of Computer Software Engineering

Weina Zhu, Jinzhen Zhan, Haiyan Dang 283

Development of Lane Departure Warning System Based on Monocular Vision

Weiwei Chen, Weixing Wang, Fengping Wang 288

Research on Mathematical Modeling of the Motion of Super - Large Double - Propeller and Double - Rudder Container Ships in Harbor

Yongxiang Li 293

Study on MOOC Knowledge Map

Yong Luo, Wei Zhao, Xiao Xiao 297

Study on the Volatility of Public Opinion of Coal Mine Safety Incidents Based on GARCH Model

Fei Wang 303

Non-Contact Sleep Staging Algorithm Based on Physiological Signal Monitoring

Jian He, Bo Han 308

Application of Intelligent Optimization of Solar Air Heating System in Large Buildings

Jiazheng Yu 315

Research on Three-Dimensional visualization of Data Center Scene

Ma Jianwei, Wan Huijiang, Liang Ling, Jiang Zaineng 319

Study and Realization of 3D Visualization System of Power Transmission Grid

Wan Huijiang, Liang Ling, Ma Jianwei, Jiang Zaineng 324

Design and Research of the Evaluation System of College Students' Learning in the Big Data Environment

Zhou Ruiling 329

The Application of the Digital Visual Effect Technology in the Urban Image Advertising Videos

Cai Zhe 335

Rural Logistics Demand Forecast Based on Gray Neural Network Model

Zhengyi Yang 340

Application of Geographic Information Technology in Natural Disaster Emergency Management System

Fei Liu 345

Internet of Things Technology and Its Application in Power System Communication

Zhang Yong, Xie Lianke, Zang Yuwei, Liu Hui, Wang Kun 350
