Since the 18 National Congress of the Party, General Secretary Xi Jinping has repeatedly stressed that Chinese Communists are not historical nihilists, not cultural nihilists, but inheritors and promoters of China's outstanding traditional culture. Human beings have had a history of civilization for thousands of years. Any country, a nation, has come to this day in the process of carrying on the past and opening up to the future. Contemporary China is the continuation and development of historical China. Contemporary Chinese ideology and culture are also the inheritance and sublimation of Chinese traditional ideology and culture. Marx said: "People create their own history, but they do not create whatever they want, not in the conditions they choose, but directly meet, set, create from the conditions inherited from the past. " the excellent Chinese traditional culture is undoubtedly the established historical and realistic conditions of the Chinese people. Lenin said: "Only by understanding all the wealth created by mankind can we enrich our minds, so as to become Communists. Act bravely, filial piety and love relatives and other traditional Chinese virtues.

To strengthen cultural self-confidence, we must scientifically evaluate the intrinsic value of China's outstanding traditional culture. Inherit and innovate Chinese excellent traditional culture. General Secretary Xi Jinping takes a historical materialism perspective. Standing at the height of realizing the great rejuvenation of the Chinese nation, the excellent Chinese traditional culture is regarded as the "root" and "soul" of the Chinese nation.

Excellent Chinese traditional culture is the "root" and "soul" of the Chinese nation. General Secretary Xi Jinping pointed out: civilization, especially ideological culture, is the soul of a country and a nation. No matter which country or nation it is, if you do not cherish your own ideology and culture and lose the soul of thought and culture, this country, this nation, cannot stand up. For the Chinese nation, our excellent traditional culture is the "root" and "soul" of our Chinese nation. The reason why Chinese civilization has survived for more than 5,000 years is the only civilization that has not been interrupted among the world's major ancient civilizations, because it has not abandoned tradition. Without cutting off the spiritual lifeline, its "root" its "soul" has been extended to this day. After thousands of years of vicissitudes of life, the 56 nationalities and more than 1.3 billion people in our country have been tightly condensed together, which is a remarkable struggle we have experienced together. Is a beautiful home that we create together, is the national spirit that we cultivate together, and runs through it, the most important thing is the ideal and belief we hold together. Thinking that Chinese traditional culture is feudal culture, serves the feudal ruling class, it is a historical burden, and is an inert force that drags the advance of the times. It is the dross that should be completely abandoned. One is cultural conservatism, which clung to the old cultural traditions. At the end of the 20th century, the Soviet Union broke up, Eastern Europe changed dramatically, and the international communist movement fell into a low ebb. At that time, there began to be a theory of reviving Confucianism in China, and then it gradually developed. Especially in recent years, some people try to replace Marxism with Confucianism, or turn Marxism into Confucianism. General Secretary Xi Jinping insisted on the principle of taking the essence of traditional culture, dismissing the dross, criticizing and transforming the past, bringing forth the old and bringing forth the new, and stressing that "we must properly handle the relationship between inheritance and creative development." Emphasis should be placed on creative transformation and innovative development. "it is necessary to treat cultural traditions scientifically, propose that only by not forgetting history can we open up the future, and be good at inheriting and innovating. We should be good at organically unifying the promotion of outstanding traditional culture with the development of real culture. Combining closely, developing in succession, inheriting in developing, we insist on using the past for the present when studying, study and apply traditional culture, bring forth the new from the past. Combining with the new practice and the requirements of the times to make a correct choice between the past and the present. We should persist in using the past for the present, learn from the past and learn from the present, persist in the treatment of the past and the present, it has the inheritance of sublation and abandonment, and we should not make great efforts to realize the creative transformation of the traditional culture by making use of the past and the present, and using the past as the wrong and the present, and try to realize the creative transformation of the traditional culture. Innovative development, we make it compatible with real culture and serving the tasks of the times with cultural people. Therefore, it is necessary to strengthen the excavation and elucidation of Chinese excellent traditional culture, to transcend time and space, transcend the country, and be full of eternal charm. The cultural spirit with contemporary value is carried forward, and the achievements of contemporary Chinese culture innovation, which inherits the excellent traditional culture and carries forward the spirit of the times based on our country so that facing the world and spreading out.
