This development phenomenon directly leads to the relatively short time and place when the student party members can play a role in the university, the lack of enthusiasm and influence, the failure to give full play to the vanguard and exemplary role of the party members among the students, and even the possibility of being absorbed by the full-fledged party members to become full-fledged probationary party members or to become full-fledged party members from the ranks of full-fledged party members may be forced to leave school, thus restricting the spread, help and role of the college party members to the party activists and other students with a certain will to join the party, thus directly affecting and promoting the construction of the party organization of college students. Therefore, for the outstanding party affairs educators, we must first of all, under the overall premise of completely obeying the party building and the overall organization work, especially pay attention to the cultivation and excavation of the reserve force of the party's mass line. From the beginning of the freshman year, the Party's mass line propaganda and theoretical education and the enlightenment education for college students to join the Party have been carried out as soon as possible, and further efforts have been made to improve the Party spirit cultivation and self-awareness of college students.
