Abstract: With the continuous development of society and the continuous improvement of economy, the state and society are paying more and more attention to the cause of education, and the ideological and political education is the top priority. Craftsman spirit is the core part of higher vocational ideological and political education, and it is a necessary condition to promote the craftsman spirit of higher vocational students to become high-level talents under the background of the new era. Higher vocational schools should combine the craftsman spirit with the ideological and political education of the students, and construct the theoretical knowledge of the craftsman spirit into a complete system, and imperceptibly convey the craftsman spirit in the process of practicing with the students, adhere to the guidance of socialist core values as psychological guidance, and emphasize the combination of craftsman spirit and ideological and political education. This article will take the higher vocational ideological and political as an example, narrates the higher vocational ideological and political education and the craftsman spirit cultivation organic union.

1. Preface

With the continuous development of China, the craftsman spirit has gradually become one of the core ideas of Chinese spiritual culture, and the craftsman spirit has a very important significance and function for the economic development of the country and the spiritual growth of human beings. Therefore,[1]. The Chinese Dream of the Great Motherland can be realized by cultivating and developing the craftsman spirit and combining with the ideological and political education of higher vocational colleges. But combining craftsman spirit with ideological and political education in colleges and universities is a difficult and systematic complex work, which requires us to carry out in-depth research and discussion from all aspects, so as to effectively promote the progress of human spiritual culture.

2. The Significance of the Combination of the Spirit and Ideological and Political Education

2.1. Role of the Craftsman Spirit

Craftsman spirit, as its name implies, is a kind of cultural thought in our country. From the craftsman's level, they have always insisted on working in a rational way, and in this process they have developed a craftsman spirit. This craftsman spirit will be rooted in the craftsman's subconscious from the moment of cultivation, guiding his thinking so that he can work rationally and lead all parts of the craftsman's daily life, and this idea basically all craftsmen exist. In the process of ideological and political education of higher vocational students, cultivating the craftsman spirit of students so that they can reach the way of influencing students' learning can be beneficial to the development of students' ideology and spirit, and can also make students' ideological spirit and moral quality reach a state of combination, and can realize the ideal form of mutual promotion and symbiotic combination. Craftsman spirit mainly contains four kinds of core: craftsman's heart, craftsman's soul, craftsman's skill, craftsman's line, in which craftsman's heart means to maintain a kind of extraordinary work attitude and work enthusiasm, to treat work to maintain a first heart, always is the state of love and dedication. If the higher vocational students

understand the craftsman's spirit through the ideological and political education of higher vocational education and form a craftsman's heart, then he can be guided by rational thought in the actual life process [2]. To sharpen oneself, to dedicate oneself. As the name implies, craftsmanship is a product of skill, which enables students to better find jobs when they go to society, and to focus on work production, carry out continuous innovation practice and pursue the best products in the state of keeping the craftsman's heart. Craftsman's soul is a kind of sublimation of craftsman's skill, which integrates the spirit of innovation into the spirit of craftsman, so that the craftsman can unify the work personality and work value organically, and can effectively prolong the vitality of craftsman's spirit. Craftsman is a kind of rational maintenance of craftsman's spirit, at the same time do a good job of sticking to the craftsman's heart and craftsmanship and craftsman's soul, realize a state beyond oneself, at the same time form the spirit of perseverance and courage to give.

2.2. Role of the Combination of the Spirit of High Worker Craftsman and Ideological and Political Education

In the process of cultivating craftsman's spirit and ideological and political education and cultivation for higher vocational students, their realization goals are consistent, they are all to cultivate students to become a better person, although their emphasis in the process of education is not the same, but the goal will always come together, are adhere to the education concept of people-oriented education to carry out the practice of educating people. And whether in the cultivation of craftsman spirit and the development of ideological and political education are carried out with the concept of "student-oriented ", student-oriented is to put students first, student-oriented, teacher-led educational concept, the object of education is students, and the guide is teachers. Students are the objects of inheritance of professional skills and subject knowledge, so both ideological and political education, subject knowledge teaching and professional skills training should put students first. Ideological and political education and the cultivation of craftsman spirit will not produce differences in the process of development, when students encounter difficulties or difficult problems, educators need to uphold the concept of student-oriented education for students to carry out scientific and reasonable education. In the process of education, the main body of teaching is all teachers [3]. All teachers can infect students through their own artisan spirit or educate them through relevant cases of craftsman spirit. In the process of cultivating craftsman's spirit and combining ideological and political education, teachers, as the teaching subjects, need to give scientific, reasonable and appropriate guidance to students, and use subtle ways to cultivate students to form good spiritual and moral qualities.

3. Combining the Spirit of High Worker Craftsman with Ideological and Political Education

3.1. Explore the Essence of Professional Literacy Education and Improve the Theoretical System

In order to perfect the theory system, it is necessary to get the recognition of its value, and it is

necessary to have the support of theory to carry on the practice. In the process of combining the spirit of the worker craftsman with the ideological and political education, we must perfect the system of theory before we can carry on the practice correctly. Therefore, the organic combination of the spirit of high workers and ideological and political education needs to deeply explore the essence of vocational education, so as to effectively improve the theoretical system. In order to further explore the vocational quality education, it is necessary to strengthen the teachers' team building in higher vocational schools. The formation of craftsman spirit is generally a long process, and the teacher as the inheritor of imparting students' craftsman knowledge must have the corresponding professional quality and moral accomplishment, and the teacher needs to keep the craftsman spirit in the process of carrying out education all the time. Play in front of students, with the role of example imperceptibly infect students. In order to perfect the theory system, teachers must fully understand the craftsman's spirit, so as to construct the power system framework of how to cultivate the craftsman's spirit in higher vocational students. Through in-depth discussion of professional literacy education and the improvement of the theoretical system can directly let the higher vocational students' cognition, situation, values, outlook on life and other aspects of infection by teachers, in the process of imperceptible change of middle school students from inside to outside, until the formation of craftsman spirit.

Figure 2 Craftsmanship

3.2. Creativity in Practice

A professional spirit closely related to practice. It is not a virtual fantasy, but a spiritual force that makes people work hard and down to earth [4]. Practical education is one of the important tools to cultivate the craftsman's spirit. To have the professional spirit of craftsman's spirit, it is necessary for the educatee to change slowly through rational cognition, practical experience and emotional cognition. Higher vocational colleges must remember to join the vocational quality education when making the talent training plan, so that higher vocational students can slowly form the craftsman spirit in the process of receiving education. Specifically, higher vocational schools can use some time activities such as vacation research, cognitive practice, practical training, production and learning cooperation in the process of ideological and political education to make the ideological and political education of craftsman spirit and practice organically combined.

3.3. Construction of the Craftsman Spirit into the Institutional Structure and Adherence to Socialist Core Values

The craftsman spirit contains the core content of the socialist core values of excellence and devotion to work. In the process of ideological and political education for students, higher vocational schools can bring the craftsman's spirit into the value cultivation system structure of higher vocational students, so that ideological and political education and craftsman's spirit can be better organically combined to achieve common development. The spiritual culture belongs to the field of consciousness in definition, and it is also an essential part of ideological and political education to carry out the cognitive education course of craftsman spirit on this basis. We can also carry out cultural month activities in higher vocational colleges, lead students to understand how the deeds of selfless dedication of their predecessors, and use the glorious deeds of great figures in

history to guide students to adhere to the socialist core values as the guide, and set up their own craftsman spirit. At the same time, the craftsman spirit is brought into the talent training system of higher vocational schools, and the scientific and reasonable way is used to guide the students to enrich and cultivate the subjective life constantly, and to form the correct world outlook and life values.

Figure 3 Craftsmanship

3.4. Attach Importance to the Coupling of the Spirit and Ideological and Political Education

It is an effective way to improve the ideological and moral character, spiritual accomplishment and life values of higher vocational students. First of all, we should pay attention to the coupling of the spirit of the high worker craftsman and the ideological and political education [5]. Secondly, we should pay attention to their linkage between the two, and finally on this basis to ensure that the process of integration does not receive other factors of infection.

4. Conclusion

To sum up, in order to realize the organic combination of high worker craftsman spirit and ideological and political education, we must combine the current actual situation, reasonably construct the theoretical system, deeply discuss the professional accomplishment education, and construct the craftsman spirit into the mechanism, adhere to the socialist core values as the guide, and attach importance to the coupling linkage between the high worker craftsman spirit and ideological and political education. In this way, it can ensure the smooth and smooth organic combination of the spirit of high workers and the ideological and political education, effectively promote the development of ideological and political education in higher vocational schools, at the same time, promote the craftsman spirit in the spiritual world of students imperceptibly rooted, effectively improve the comprehensive quality of students.
