**Abstract:** In Xi Jinping's era, people have further developed the thought of socialism with Chinese characteristics, and have made new plans for the future development of our country. The ideological and social characteristics of the new era have put forward new requirements for our socialist education. Our educational undertakings also need to use the ideas of the new era to complete the educational work. Therefore, it is necessary for us to grasp the characteristics and laws of the new era and use new ideas to complete the education work, so as to cultivate all-round qualified personnel and promote the development of our socialist cause.

## 1. The Meaning of Educational Thought in the New Era

After Comrade Xi Jinping became the leader of our country, he put forward a series of new socialist thoughts. He gave a new explanation to the past socialist thoughts, such as the idea of building a well-off society in an all-round way. He put forward two goals for a hundred years. He put forward the concept of the Chinese Dream, and he also put forward the need to develop and improve socialist values and new development concepts. He also put forward the idea of vigorously developing network supervision. General Secretary Xi Jinping's expositions in various aspects have formed the thought of education in the new era, which embodies the direction of talent cultivation and education development in the new era. Only in strict accordance with the ideological guidelines laid down by General Secretary Xi, can we carry out education, embody the spiritual and civilized connotation of socialism with Chinese characteristics, and make the idea of education with Chinese characteristics truly serve our educational cause.

Although the idea of "education with Chinese characteristics" was put forward by Secretary-General Xi at the meeting, it has not risen to the status of socialist construction. With you, we must have a correct understanding of this idea and avoid the rigidity in the process of using it in education. Understanding the idea of "education with Chinese characteristics" requires us to proceed from various angles. Firstly, the idea of "education with Chinese characteristics" refers to Secretary-General Xi's exposition and narration of some special fields and his general policy on the work in different fields. Secondly, the idea still plays the role of traditional Chinese medicine in the educational concept of the new era and should be in the new era. The times continue to adhere to the socialist road with Chinese characteristics, so that education can contribute to the construction of socialist cause.

If we want to use the thought of education with Chinese characteristics to complete the ideological and political education in the new era, we must understand the inherent meaning of this thought, which is mainly as follows:

### 1.1 Socialist Ideology

Ideology is the issue of people's views on one thing and an important component of the socialist system. Only by ensuring the ideological consistency of the people throughout the country can we succeed in building our socialist cause. General Secretary Xi combines socialist ideology with modern society, so that socialism can better solve the current problems in China's development, and further promote the development of our socialist cause. He uses our construction of socialist ideology, through education with Chinese characteristics to complete the construction of socialist ideology, and for people's ideology. Know, let the people in the ideological concept of unification, so want to

understand the educational thought with Chinese characteristics, we must complete the ideological concept construction.

## **1.2 Socialist propaganda and ideological work**

The theory of education with Chinese characteristics needs to be accomplished through propaganda and ideological work. Only under the current social background, according to some new ideas and theories, can we concise the socialist ideology so as to cast our soul into the rest of us. It is of profound significance to the propaganda work of educational thoughts with Chinese characteristics, and it is also of great significance to the cultivation of people's ideological concepts and the cultivation of people's ideological concepts. China's overall development strategy plays an important role. Many of the ideological theories on education with Chinese characteristics were summarized and put forward in Comrade Xi Jinping's speech on the current situation. Therefore, we need to do a good job in propaganda of education with Chinese characteristics to ensure the construction of socialist spiritual civilization.

## **1.3 The educational thought with Chinese characteristics contains Comrade Xi Jinping's ardent expectations and ideals for China's development.**

The educational thought with Chinese characteristics contains Comrade Xi Jinping's expectations and ideals for the development of our country, as well as his expectations for all the people. Therefore, all the people should have a high understanding of the educational thought with Chinese characteristics, improve their ideological and political awareness, and strengthen their ideals and beliefs. General Secretary Xi made many wonderful speeches on the education of ideals and beliefs. He proposed that we should put the education of ideals and beliefs of Party members in an important position, ensure the purity of the Party spirit and the excellence of their own style, and let every Communist Party member have a healthy personality and political soul, so as to promote the development of our country.

## **1.4 The formation of the core values of the people's socialism in the educational thoughts with Chinese characteristics**

In order to complete the spiritual education for the people with Chinese characteristics, we must pay attention to the cultivation of socialist core values in the process of education with Chinese characteristics, so that people can cultivate socialist core values in the process of ideological learning. In his speech, Secretary-General Xi mentioned the practice and cultivation of socialist core values for the people of all walks of life. Specific requirements, at the same time for the socialist core values of education methods and guiding ideology have been explained. Socialist core values are the requirements of every individual for the development of socialist cause. We need to constantly promote and improve the process of education with Chinese characteristics.

## **1.5 Educational Thought with Chinese Characteristics or the Product of the Sinicization of Marxism**

Educational thought with Chinese characteristics is developed by the Communists in the process of using Marxism in China. Every Communist Party member should have a good understanding of Marxism, improve his own political theory level, perfect himself in continuous learning, improve his political consciousness and cultivate his own political soul. In his many speeches, the General Secretary mentioned that we should develop the educational thought with Chinese characteristics through Marxism, so that the educational thought with Chinese characteristics can cultivate more talents for the construction of socialist cause.

## **2. Methods and Strategies for Completing Education with Chinese Characteristics through New Ideas**

### **2.1 Pay close attention to the changes of national policies and find the starting point of education with Chinese characteristics**

In the new era, Secretary-General Xi constantly put forward strategies and methods for the development of our socialist cause, and also determined the direction of our socialist cause development. Therefore, our ideological work of education with Chinese characteristics also has a richer spiritual and civilized connotation. At the same time, Secretary-General mentioned the education with Chinese characteristics in many speeches. Thoughts have elevated the theoretical level of this thought to a new level. If we want to accomplish the construction of socialist cause in the new era and cultivate useful talents for the construction of socialist cause through the educational thought with Chinese characteristics, then we must keep pace with the times, find the driving force of the educational work with Chinese characteristics, and carry out the educational work with Chinese characteristics. First, we should enrich our spiritual connotation by using the socialist thought. The continuous learning of characteristic socialism has improved our political and theoretical level. At the same time, we have completed the ideological construction of the Communists and the army through the educational thought with Chinese characteristics, so that the Communists and the army can be regarded as a solid reliance on our political stability. At the same time, we should let Comrade Xi Jinping's ideological principles guide us to carry out the ideological work of education with Chinese characteristics, establish the leading position of Comrade Xi Jinping's thought in the whole Party, and make his thought influence the ideological simulation of the people, so as to arm the people's thought with theoretical thought and maintain the stability of the overall political environment. At the same time, we should also make a high-level summary and interpretation of Comrade Xi Jinping's thoughts, keep abreast of changes in national policies and ideas, and let socialist ideology guide people's ideological construction, so as to complete students' ideological construction. Let students be the backbone of our socialist construction.

### **2.2 Define the direction of educational thought work with Chinese characteristics**

Comrade Xi Jinping pointed out the direction for the development of education with Chinese characteristics. We should improve students' ideological awareness and make them contribute to the development of socialism through education with Chinese characteristics for the people. If we want to use the ideas of the new era to complete the education with Chinese characteristics, we must focus on the cultivation of students' quality and ideological and political construction of socialist core values, so that students can make clear the development direction of their own life path. To cultivate students' plans for future life, with the proposal of our two hundred-year dream, students should understand the direction of their life through learning, and have completed the great rejuvenation of the Chinese nation as their responsibility. Therefore, we must cultivate students' future concept, let them discover their hobbies and specialties in the learning process, and then find their areas of expertise to play their own specialties. Secondly, we should cultivate students into comprehensive and high-quality talents. Under the ideological requirements of education with Chinese characteristics, we have put forward higher requirements for students' cultural quality and ideological and political level. We should not only cultivate talents with high cultural quality, but also make students have good political beliefs and political awareness, so that they can learn by themselves. Cheng improves his own ideological awareness, and at the same time finishes his work well after he enters the society. Finally, the cultivation of education with Chinese characteristics also needs to cultivate talents with high cultural level and political consciousness. In the process of training students, teachers should play a leading role and set an example for students. At the same time, teachers should constantly improve their theoretical and ideological level in the process of teaching, and then complete teaching with the latest ideas. Work to grasp the direction of education with Chinese characteristics.

### **2.3 Cultivate the educational concept of teachers and students with Chinese characteristics, so that the educational concept with Chinese characteristics can be deeply rooted in the hearts of the people.**

For a long time, the ideological and political education of students has not been perfect in our educational undertakings, which leads to students' low level of ideological awareness and political theory, and cannot serve our socialist development wholeheartedly. Therefore, we must closely follow the development of educational thought with Chinese characteristics in the new era, so that the ideological concept of education with Chinese characteristics can truly change the concept of teachers and students. We should combine the new political thoughts with the past political education. Under the influence of Comrade Xi Jinping's new ideas, we should not forget the existing political thoughts. We should complete the study of the two, so that students can understand that political thoughts are changing with the times, and let students improve their political level in continuous learning. At the same time, organize more red activities to let students learn about the history of the Party and the country, and understand the development history of their country. At the same time, the application of the educational concept with Chinese characteristics also requires us to extract the essence from the traditional ideological and ideological work and discard the dross. We should also remove some bad ideas for studying the correct theories in the past political education process. In view of some political corruption incidents in the new era, we should educate students with real cases, make them realize the good development of our political work, and let them establish their own correct values and political concepts from the study of these cases. At the same time, the development of education with Chinese characteristics should not only stay in theory, but also cultivate students' socialist core values in practice. For example, we can strengthen students' ideological and political education in their daily teaching and extracurricular activities, so that students can use theoretical knowledge in practical activities, and then improve their ideological and political level. At the same time, student Party members should play their exemplary leading role, strictly require their own words and deeds, and practice the core values of society, so as to better carry out the ideological work of education with Chinese characteristics.

### **2.4 On the existing means of education, further explore the methods of education with Chinese characteristics.**

In his speech, General Secretary Xi mentioned that it is not easy to achieve the goal of building a well-off society in an all-round way and achieving the goal of two hundred years' struggle. This requires us to complete the education with Chinese characteristics through new ideas in the new era, complete the ideological construction for the people, and then build the cause of socialism with Chinese characteristics. Therefore, we must follow the trend of ideological change and complete the education with Chinese characteristics. First of all, we need to summarize and summarize the contents of the new ideas so as to facilitate our educational work. In learning Comrade Xi Jinping's thoughts, we should constantly enrich the contents of our political education textbooks, and pay close attention to the national ideological and political conference, so as to ensure the frontier characteristics of our educational work with Chinese characteristics. At the same time, we need to strengthen the rational arrangement of students' ideological and political education. In the ideological and political education of students, we need to make a reasonable overall planning of classroom teaching and popular lectures, and use the classroom to complete the most basic political education for students. Through lectures and other activities, students can learn the latest political theory and knowledge, and then. Complete education with Chinese characteristics.

## **3. Conclusion**

Under the leadership of Comrade Xi Jinping, the construction of our socialist cause has come to a new era. But at present, there are still some problems in our work of educating people. Our ideological and political education work is not good enough to improve the ideological level of students and let them serve the goal of socialist construction. Therefore, in the new era, we need to

grasp the characteristics and laws of the times, understand the latest political trends and ideological changes, and use new ideas to complete the education with Chinese characteristics, so as to promote the construction of the socialist cause and complete the Chinese dream of the great rejuvenation of the Chinese nation as soon as possible.
